

New information

Are there spectacular photos available to prove or substantiate that the information is correct?

Yes
Reverse Google Image Search (use an image to search for similar images on the web) <https://images.google.com>

No
Google search: for every statement / assertion plus "Fact Check"

Yes
Do the pictures fit to this information and do they only exist in connection with this one story, at this place and at this time?

Renowned fact-check portals can be recognised by the fact that they disclose the sources of their information in a transparent and comprehensible manner and that they do everything possible to refute their own statements.

Fact check at renowned portal refutes the information

Yes

No
Google for the source of the information. (Imprint or site owner)

Renowned sources describe them as untrustworthy

Yes

No
Are there other, reputable sources with the same information?

A reputable source can be recognised by the fact that it follows the principles of scientific publishing or at least makes all statements critically verifiable using the original data.

Yes
Does the information conflict with current information or information accepted by the majority of scientists?

No
Think: How likely is it that the majority has conspired to spread untruths? Are there any motives for this at all, which have moreover been critically examined, or are these also just assertions without proof?

Very likely
Very unlikely

The information is (probably) correct

The information is (probably) incorrect
